

## Tracking of assets and their conditions with a compact flat device

**Six Senses Monitoring:** Up to six sensors for temperature, humidity, air pressure, 3D-acceleration, light & location enables monitoring of asset conditions corresponding to your individual needs. The solution is built to tackle many different IoT use cases, from outdoor tracking mobile assets to monitoring an indoor environment.

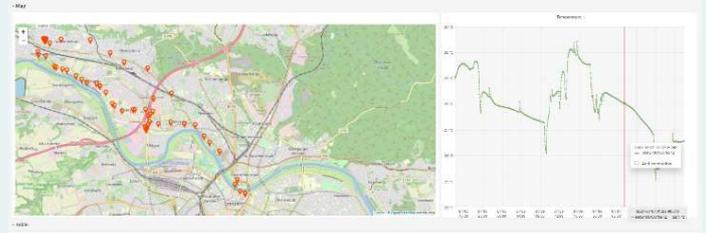

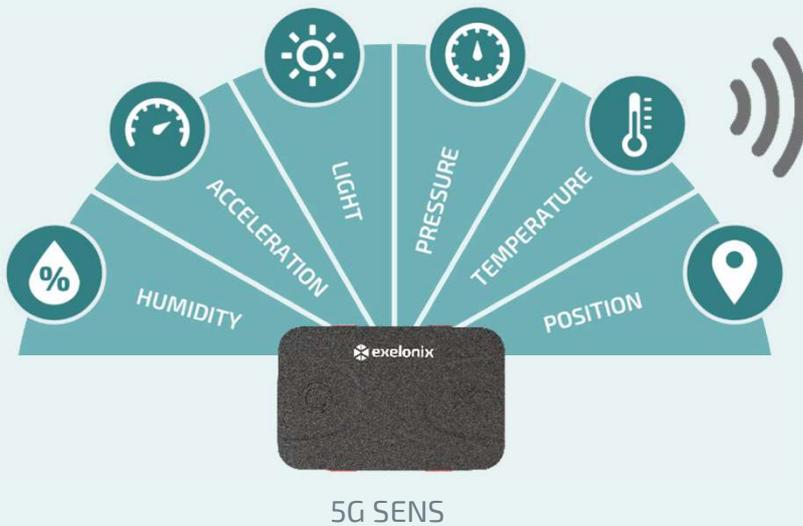

**Connectivity:** Cellular networks provide worldwide coverage for seamless tracking of goods, based on NB-IoT and Cat-M1. For countries without these 4G/5G networks the tracker offers a 2G network fallback.

**Long Battery Lifetime:** Based on the Qualcomm 9205 chipset 5G SENS offers connectivity and GNSS positioning along with low power technology for long battery operation. Preconfigured Power Save Modes are available for long battery lifetime. Remote configuration allows to tailor the device messages to the needs of the practical use case.

**External Sensors:** There are two ways to connect external sensors to 5G SENS:

- via Bluetooth Low Energy (BLE) or
- via 4 GPIO ports simply accessible via a specific USB-C cable

Cloud Backend

Clip Holder\*

USB-C Charger

### Connectivity:

3GPP Release 14 LTE Cat NB2  
 3GPP Release 13 LTE Cat M1  
 Bands: B3/B8/B20  
 GPRS Bands: 900/1800MHz  
 SIM-Card: 3FF (Micro SIM)

### Location Services

GNSS (GPS, Galileo)  
 QuecLocator\* (positioning via cellular base stations)

### Local Connectivity:

Bluetooth Low Energy Rx  
 Bluetooth Low Energy Rx/TX\*

### Chipset

Qualcomm MDM9205

### Data Transfer Protocols

TCP/ SSL/ TLS/ HTTPS

### Security Features

Protected device memory  
 Secure communication via transport level security (TLS)  
 Device authentication via ECDSA signatures

### Certifications

CE-RED, GCF, Vodafone  
 RoHS, REACH, WEEE  
 Battery: EC 62368-1, UN38.3, 2006/66/EC, UL1642,  
 IEC62133 -2, IEC 62321-4, IEC 62321-5

### Sensors

Accelerometer: 3 - axis  
 Orientation: 0 to 360 degrees around x and y  
 Temperature: -10 °C ... 70 °C ± 1 °C  
 Humidity: 5% - 95% RH ± 5%  
 Barometer: 260 to 1260 hPa ± 1 hPa  
 Ambient light\*: 0 - 68k lux

### Interfaces

4 I/O Ports (via USB-C)

### Indicator/Buttons

3 LEDs  
 2 Buttons

### Electrical data

Power Supply via USB-C  
 Rechargeable LiPo battery 3.7V, 2.750 mAh  
 Primary Cells\*: 3AA Batteries

### Housing:

Housing: IP40, IP65\*  
 Dimension:  
 • 90x58x25 mm (with LiPo battery)  
 • 90x58x34 mm (with 3 AA-Type battery)\*  
 Weight 120g (LiPo battery)

### Environmental Conditions

Min/Max. Temperature:  
 • Rechargeable -10 °C to +70 °C  
 • 3AA Battery\* -40° C to +80 °C

\* Option on request

Features	GOOD	BETTER	BEST
Connectivity			
NB-IoT	X	X	X
LTE-M	X	X	X
GSM	-	X	X

E2E Encryption	-	-	X

## Preinstalled Tracking Use Cases:

### 1. Inventory Track

- Periodic messages (at configured time of the day)
- Alarm messages on motion detection (configurable)

### 2. Theft Track

- Alarm messages on motion detection within configured time of the day (configurable)

Remote parameter setting allows tracking configuration directly from the cloud.

## Customized Device Software

5G SENS can be programmed freely and easily to **support your specific use case**. Ask us for a device set-up, that is tailored to your specific requirements.

\* Options on request

## Estimated Battery Life

more than 2000 messages (in typical tracking scenarios)

## OTA (Over-The-Air) Configuration

Remote update of

- Application parameters
- Device application SW
- Complete firmware
- Modem firmware

## Cloud Support

- Exelonix IOT Cloud & Grafana
- Vodafone IoT Tracking
- Telekom Cloud of Things\*
- BOX-ID\*
- Others on request
